

archengg was established in 1994 as an individual architectural and structural design firm in Islamabad to set-forth new dimensions of creativity with sound technical strengths incorporating advance technologies in the field of Architectural & Structural Designing. The arch-team consists of versatile, qualified architects, interior designers and structural engineers. The firm grew into a private limited company in 2007 combining all architecture and engineering practices.

### **Team Lead**

The arch-team has versatile, qualified architects, interior designers and structural engineers. Mr. Syed Rehan Khalid who has taken the step forward for this establishment heads the arch-team. He is a qualified architect from UET Lahore, member PCATP and worked for Abdul Majid & Associates in Lahore and Design House in Islamabad but his vision always ran faster than his colleagues. His skills in planning are remarkable with a unique feature of optimal space utilization. He is well versed in modernizing the ancient designs according to current needs. His work speaks itself for his high-tech creativity.

### **Support**

He is supported by a young energetic consulting structural engineer and gold medallist (Civil , UET). Mr. Noman Khalid has worked for UET Taxila and ICEPAK Islamabad. He has developed structural analysis & design software. He is taking up full charge of structural designs and delivering international standards at your doorstep.
